EXPERIENCE

2023 Jan

Senior Frontend Developer

Company: ProducePay

I specialize in developing and optimizing applications using React, NextJS and implementing GraphQL for efficient data retrieval. I work closely with cross-functional teams to translate user needs into effective software solutions.

2021 sept

Mid Senior FE Developer

Company: Sofftek

In Sofftek I have dedicated myself completely as a FE developer working mainly with React and Next JS migrating and maintaining the aspire rewards platform as well as maintaining the legacy platform with polymer. I worked on the implementation of a headless CMS using Contentful, optimizing content delivery. Ensured SEO best practices and improved accessibility scores.

2020 nov

Web Master, Project manager

Company: Red n Black Team

In this computer security and programming company, I was hired as a project lead for various web development initiatives. I worked hand in hand with technologies such as laravel, laravel mix, typescript, webpack, vue 3, AWS, Management of different apis and many other technologies. The company developed different web applications focused on products and services.

2020 jun

Full Stack Web, Focused on CMS

Company: Vex Solutions

In this international company I have been working, developing different modules. Plugins and tools focused on PHP-based CMSs such as PrestaShop, WordPress, WooCommerce, and Magento. I developed various plugins, including facial recognition, cryptocurrency integration, payment gateways, QR-based payment services, Amazon services, bots, extensions, and headless implementations.

2018 Jun

Full Stack Web Developer

Company: Gant Business Solutions

In this agency I developed as a full stack web programmer, leading projects doing: requirements, design, development, testing and maintenance of numerous web pages and services. Using different tools, technologies and frameworks. From applications made from scratch to applications made with wordpress and their respective themes and extensions. This has allowed me to broaden my vision of the web design and development industry.

2018 Ene

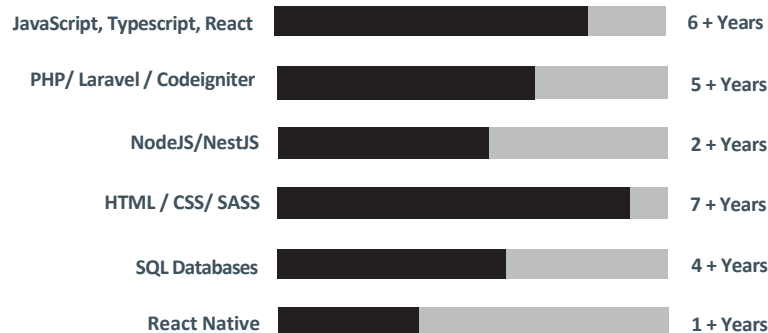

Web Programmer Intern

SECOGEY (Mexican Government)

Developing the project "Comprehensive System of the General Comptroller's Office". Carrying out the following activities: Web development, Requirements statement, database design and Documentation. Focused on PHP and JS
